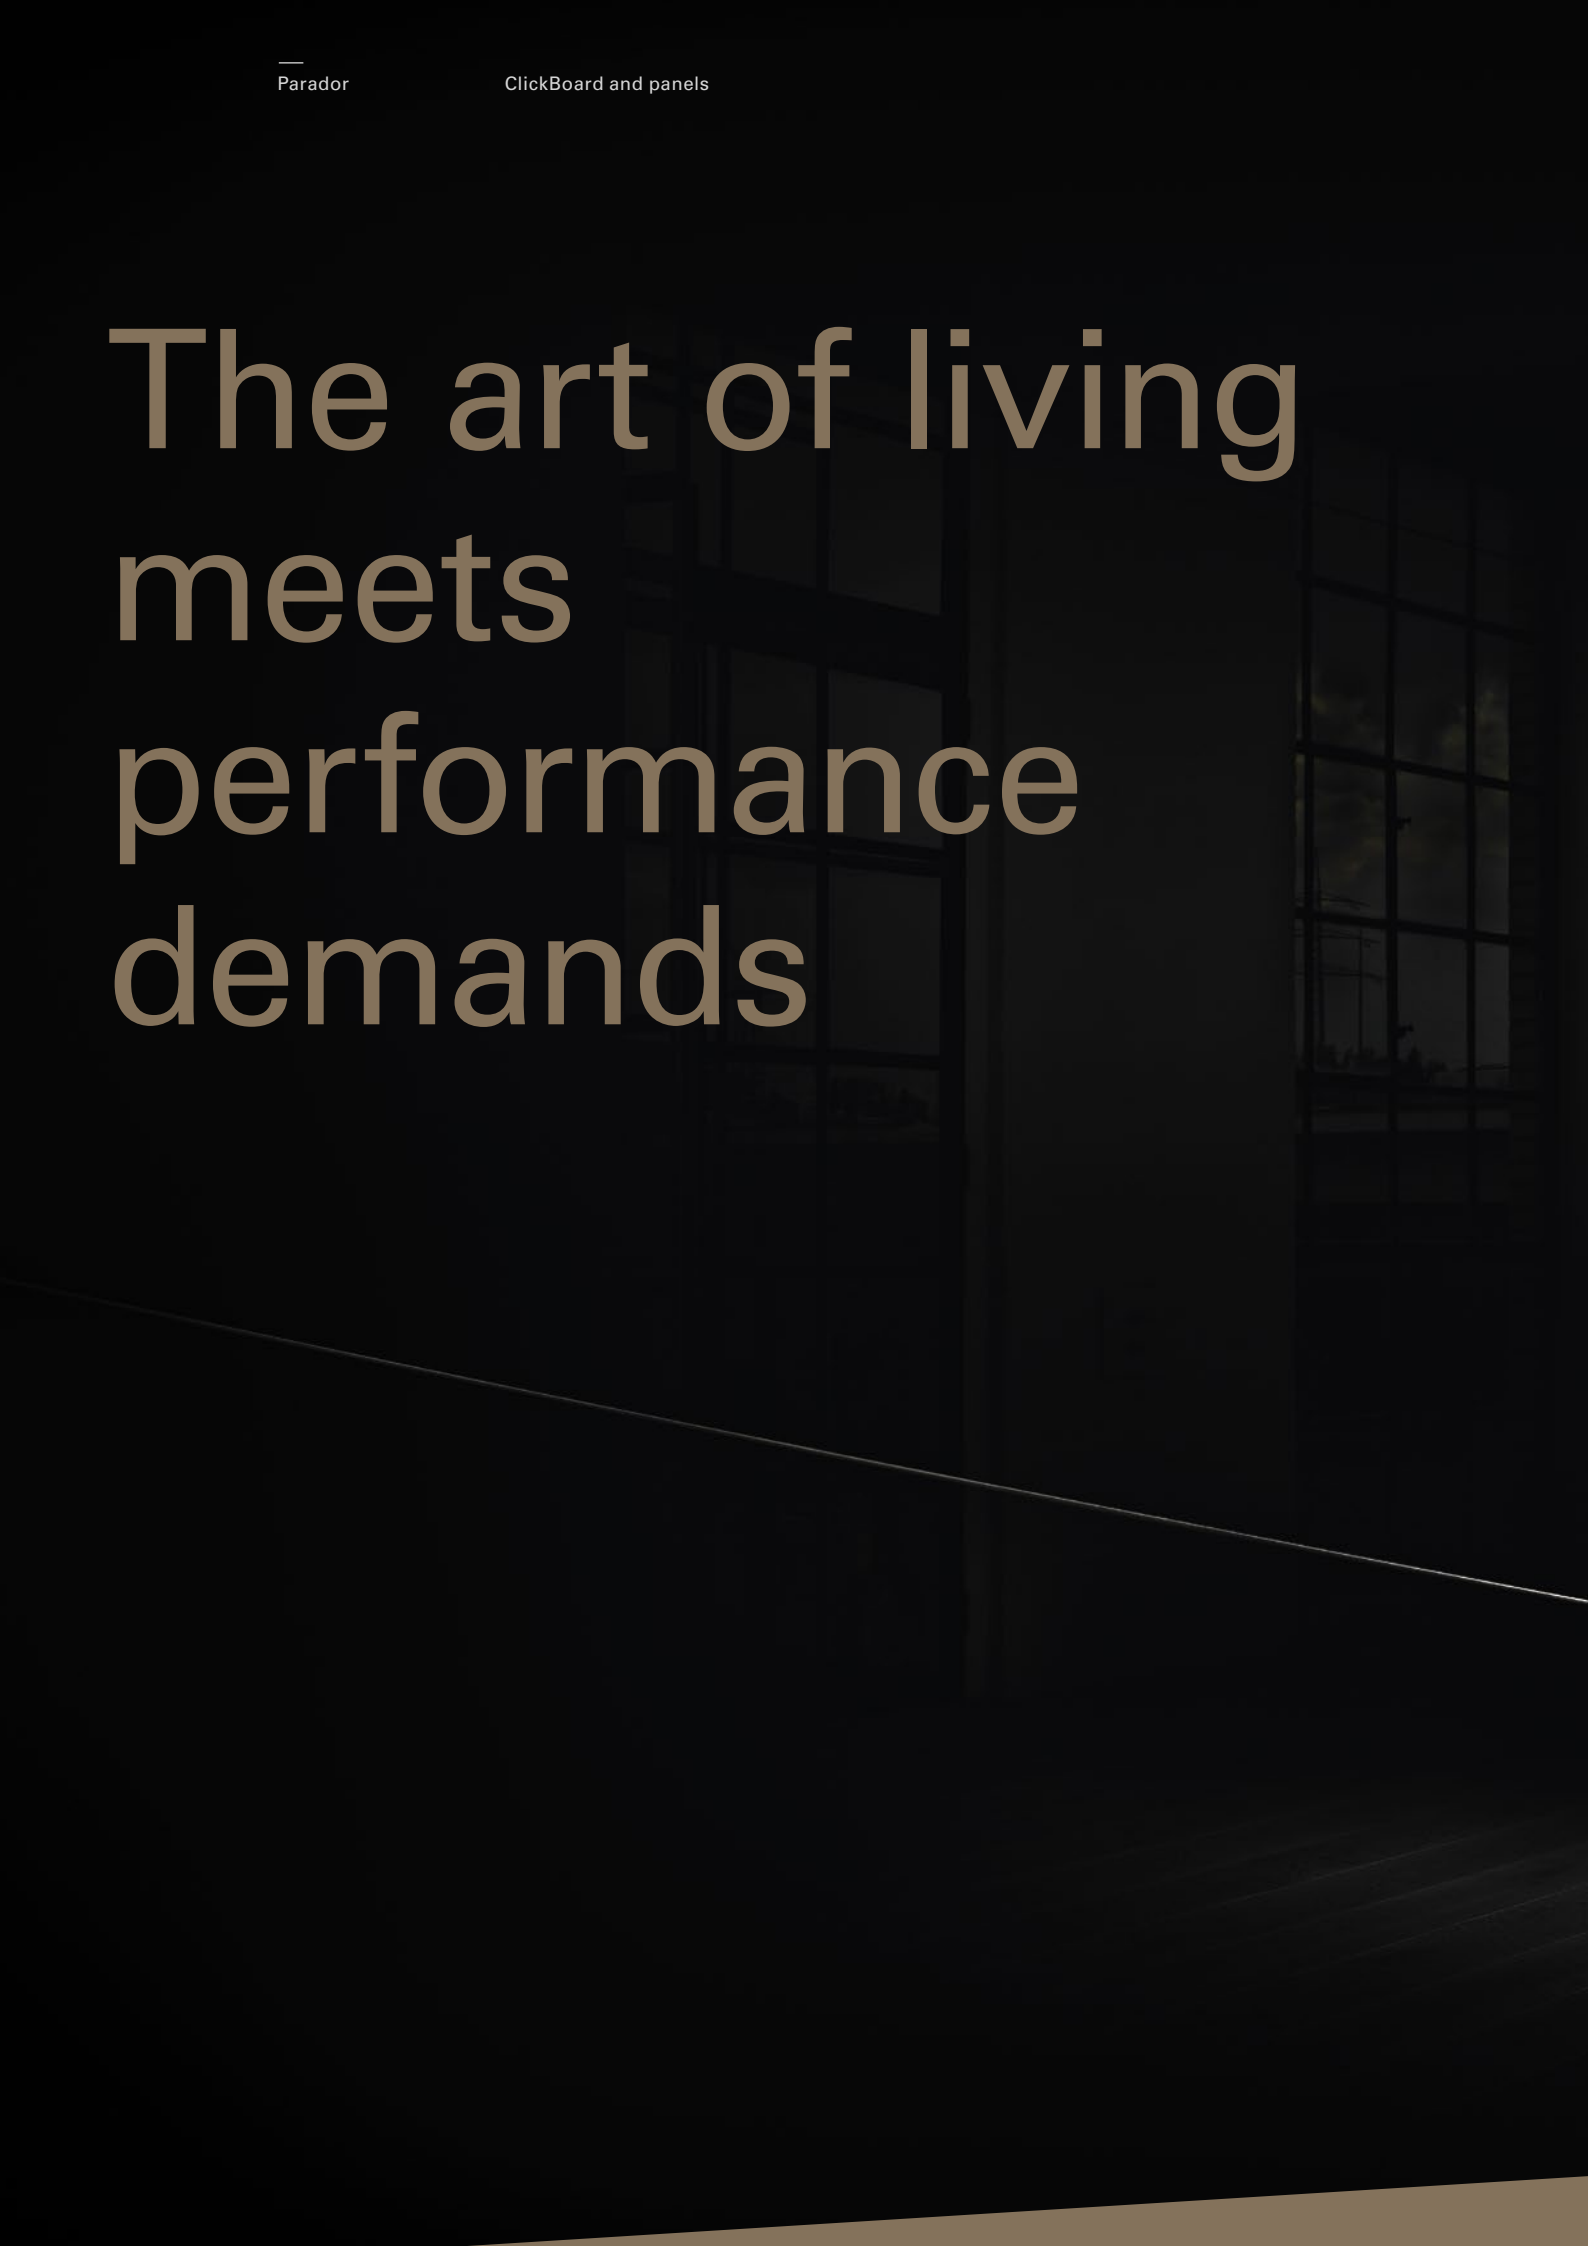
ClickBoard and panels

PARADOR

living performance

The art of living meets performance demands



PARADOR

Good reasons for Parador

Philosophy

We live for products that make every home the most beautiful home in the world. Our value compass points the way: Innovative, sustainable and ecological, we are committed to the highest quality standards in all aspects of our company. In the process we always keep our feet on the ground – the basis of our success.

Technology

In order to make laying by hand simple and effective, Parador offers innovative click connections or high-quality adhesive systems that ensure long-term stability, depending on the product. From use in damp rooms to the integration of underfloor heating, products from Parador provide the perfect solution in premium quality for every context.

Inspiration & Design

The contemporary design of our products is influenced by the latest trends from art, design, architecture and lifestyle. This inspiration is taken up by our design team, which transforms them into innovative and special looks that turn our products into trendsetters of living space design with an outstanding ecological balance.

Healthy living

The production of environmentally friendly products is a key concern for us and is firmly anchored in our corporate philosophy. Our products promote healthy living, are low-emission and create a pleasant living environment. We mainly use natural raw materials which are subject to constant review.

Quality & Materiality

Parador offers aesthetic concepts for every application, which are produced from high quality and recyclable materials. An authentic look, functional design and the environmentally friendly selection of materials enable the implementation of sophisticated "Made in Germany and Austria" living ideas.

Sustainability

As a traditional wood processing company, the high regard for the environment is the foundation of our work. For this reason, we want to set standards in all aspects of ecologically responsible production – from raw materials to finished products to logistics.

PARADOR

living performance

ClickBoard and panels – expressive

With Parador ClickBoard and panels, tired wall and ceiling surfaces are transformed into expressive and individual furnishing elements of your home. With a particularly high quality requirement and a variety of different decors and textures, the Parador product range for walls and ceilings offers the right product for every furnishing style.

The ClickBoard and panels product lines consist almost 100% of wood and are therefore low-emission and ensure a comfortable living environment. They are "Made in Germany" and are easy to install.

A sense of space with system

Parador offers exclusive home furnishings not only as floor covering. The Parador product range also has high design and quality requirements for walls and ceilings. With Parador ClickBoard and Parador panels as well as matching accessories, the living space becomes a perfect interplay of high-quality products, tasteful design and innovative technology.

ClickBoard and panels – ready to live with style

Parador solutions for walls and ceilings offer a variety of design alternatives for classic wallpaper or plaster. Decor papers with authentic interpretations of high-quality wood or other materials such as stone or concrete can be found in the true-to-nature designs with their different formats, installation looks and joint image recognition. In the two different product areas ClickBoard and panels, Parador meets the high demands of modern architecture and renovations in design and function for every room.

ClickBoard

Whether for the design of large-scale walls, ceilings and sloping ceilings or the conscious accentuation of individual living areas, ClickBoard is a ready-to-use panel for fast design solution without joints, with its practical formats and authentic decors and surface structures.

Panels

As an exciting all-rounder, Parador panels give walls and ceilings a very personal charm and authenticity. Whether it is a roof construction, new construction or renovation: the Parador panel systems Novara, RapidoClick, MilanoClick, Home and Style, the sophisticated home or craftsman finds functional and stylish solutions to meet a wide range of design requirements.

All-rounder for walls and ceilings

ClickBoard and wall and ceiling panels are characterised by a functional design and intelligent technology. In addition to the impressive looks, the products are particularly convincing thanks to the secure click mechanisms or the fast tongue and groove push-in connection for easy handling. The different widths and assembly-friendly formats are perfectly matched to the different areas of application of wall, ceiling and roof construction and thus offer a wide range of renovation solutions.

Joint and format variants

Parador panels and ClickBoard transform wall and ceiling surfaces of architectural needs into functional and expressive eye-catchers of your new living space. In addition to the stylish decors themselves, the three different joint variants support the effect of the individual panels and also display the wide range of different formats accordingly.

Joint design

Without joints ClickBoard

The jointless installation allows the ClickBoard to have its large-scale effect without recognisable spaces.

Design joint panels RapidoClick/ MilanoClick/Style

The design joint of the two Click panels gives the room an individual look due to filigree transitions.

0 cm joint Panels Novara/Home

The modern 0 cm joint with all-round Softline edge accentuates each individual panel and sets it in scene.

Ceiling mouldings and accessories

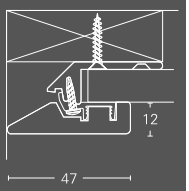
If the right solution is chosen for walls and ceilings, the mouldings adapted to the decor create the perfect transition for a harmonious overall impression. Their different shapes give each room an impressive appearance and individually frame their new residential unit.

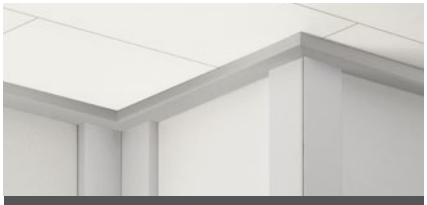
As a system supplier, Parador provides the exactly matched accessories for assembly. Special fixing aids such as claws or moulding clips for the panels or middle brackets and screws for ClickBoard enable easy attachment. Our matching caps in aluminum look or white ensure a perfect moulding finish.

Mouldings for ClickBoard

Universal moulding

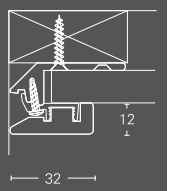
Universal mouldings are used as ClickBoard edge brackets for outside and inside corners as well as for various connections and coverings.





End moulding

End mouldings are inserted all around the surface as the edge attachment of ClickBoard and to cover the edge distance.

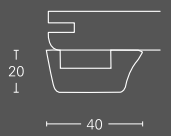


Decor ceiling profile

Ceiling profile DAL 1

Discreetly rounded end moulding for a modern ambiente.

Assembly with brown clips.



Ceiling profile DAL 2

Curved, unobtrusive end moulding for a classic, homely ambiente.

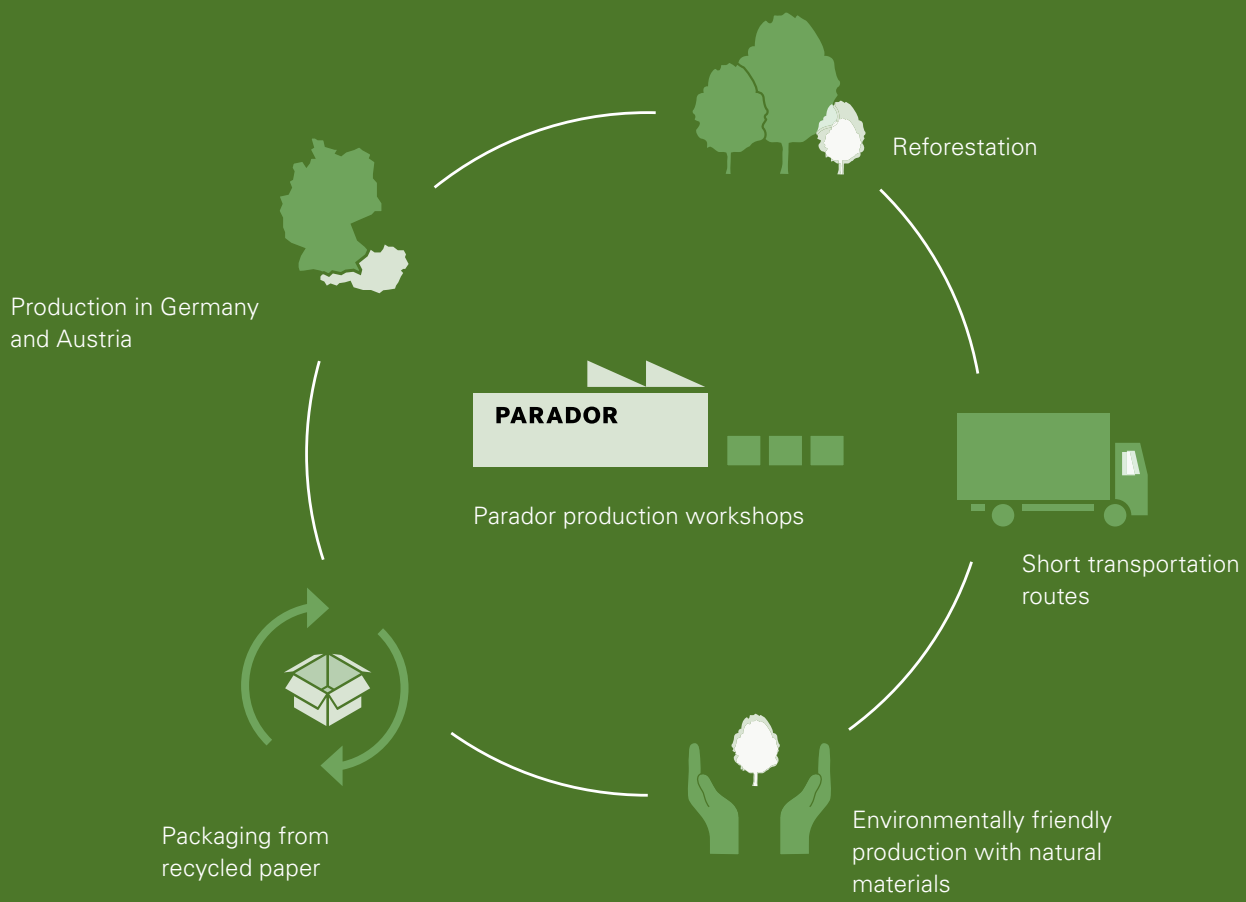
Sustainable setting standards



Certified security from responsibility

As a brand manufacturer, Parador is fully and continuously certified by independent institutions. Production processes, materials, resource and environmental management, as well as product quality, meet the high corporate values of a brand with responsibility, in addition to the legal requirements. Our quality standards for ClickBoard and panels go beyond legal requirements, something which is proved by the various certifications.

only for ClickBoard

Émissions dans l'air interieur (Class A+)

This national classification valid in France indicates the quality of indoor air.

only for panels

Émissions dans l'air interieur (Class A)

This national classification valid in France indicates the quality of indoor air.

The Blue Angel

The "Blue Angel" has certified Parador ClickBoard and panels as low-emission products.
The eco-label DE-UZ 176.

TÜV Rheinland

Parador ClickBoard and panels have earned the TÜV certification mark thanks to its perfect product quality, product safety, understandable user documentation and the independent monitoring by the objective institute TÜV Rheinland Germany.

PEFC™

This trademark is awarded to products that meet the requirements of the certification system for the documentation and improvement of sustainable forest management with regard to economic, ecological and social standards.

Good reasons for Parador

Our stance

As a traditional wood processing company, we have a special awareness of our environment. For us at Parador, sophisticated living goes hand in hand with the responsibility to preserve nature for future generations. This includes the sustainable use of our resources. Every product made of wood is an active contribution towards climate protection. As a vital carbon store, wood products are increasingly entering people's consciousness, especially in the field of construction and renovation. Products made of wood and wood materials are sustainable and help to secure the future of the next generations.

Commitment

Parador is the first and so far the only producer of floor coverings to be EMAS-certified. In this way, we are committed to constantly optimising our environmental management: the requirements and components of EMAS include the involvement of all the company's employees, transparent and sustainable communication with the public, continuous improvement of our own environmental performance and compliance with applicable legislation. EMAS is recognised worldwide as the most demanding system for sustainable environmental management.

Production

Our main raw material is wood from predominantly sustainably managed forests. We offer exclusively real wood from controlled sources of supply. The demand for transparency spans all aspects of the value chain and is documented in defined environmental standards for our suppliers. Our production is characterised by the avoidance of emissions and the return of reusable materials into the production cycle, short transport distances and the use of recyclable materials.

Society

We have been involved with the "Plant for the Planet" foundation since 2011, whose goal is to put a stop to the climate crisis. Against this background, Plant for the Planet has set itself the task of planting a trillion new trees worldwide by 2020. Parador is supporting the initiative with tree planting and the organisation of children's academies. In the meantime, we have trained 550 children to become climate ambassadors and have planted 110,000 trees.
